Allowable Subject Matter

1. Claims 1-10,12-21,23-25 and 27-30 allowed.
2. The following is an Examiner's Statement of Reasons for Allowance:

In interpreting the claims, in light of the specification and the applicants' arguments, the examiner finds the claimed invention to be patentably distinct from the prior art of record.

The prior art of record teaches the invention substantially as claimed. However, the prior art of record fails to teach or suggest individually or in combination a system and method comprising a server of a first type and a server of a second type wherein a client queries the server of the second type to obtain a list of the servers of a first type that maintain a conference wherein the list excludes servers that do not maintain at least one conference.

The examiner finds the applicants' arguments in page 3 of the of the arguments filed October 11, 2005 to be persuasive. The applicants argued in substance that Larson teaches a peer-to-peer system comprising persistent conference objects that store information about a conference, wherein the persistent conference objects are stored locally at a user location.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
